

CARBOXY MASK – CO2 OXYGEN THERAPY

Immediate charcoal foaming mask.

It is a multi-action foaming mask that immediately performs as a Deep cleanser, refining pores, supplying hydrating, smoothness and refreshing effect on the skin.

There is a demand for every-day products that will perform immediately.

BAMBOO CHARCOAL

Many Asian civilizations have used charcoal for centuries. Japanese have been using charcoal as food for detoxification purposes as it can absorb the waste materials from our digestive system. It is a porous material with excellent absorption property because of its large specific Surface area. Such porous structure allows it to absorb and filter harmful chemicals, toxins, and all sorts of organic and inorganic impurities.

Bamboo charcoal is made from Moso bamboo timber. Its composition is purely carbon ordered as six sided or hexagon holes which are joined together.

Bamboo charcoal is an environmentally functional material that has excellent absorption property. The Surface area of 300 m²/g makes it an ideal purifier and humidity controller. Moso bamboo is grown for about 5 years without pollution. After harvesting it is carbonized in an oven at temperatures above 1000 °C. Subsequent activation, ultrafine grinding, sieving and sterilization the final bamboo charcoal powder is obtained.

What it does:

Absorbs minerals, toxins, impurities and other harmful substances from your leading to a stronger and healthier skin.

It helps to get rid of chemicals from skin pores.

It exfoliates dead skin cells.

Stimulates cell growth leading to supple, delicate and smooth skin.

It is excellent for cleaning oily and acne prone skin types.

DIRECTIONS FOR USE:

Apply a thick layer to all the face, neck and décolleté. Let 12 minutes.

Remove with warm water

- Anti – acne
- Detoxifying
- Dead cell removal
- Natural Ingredient
- Oily skins
- Purifying
- Pore reduction
- Re-energizing
